

SCEK Project Profile

Project Name:	Analytical Support for Management Options
Project Number:	BCIP-2015-03
Proponent:	Forest Ecosystem Solutions
SCEK Funding Envelope:	Boreal Caribou
Timeframe:	April 1, 2014 to December 31, 2014

Project objectives

The objectives of this project are to:

- Provide analytical support for development of management options for Boreal Caribou in Northeast BC.

Project description

Investigate various industrial development and natural disturbance scenarios of potential land use outcomes.

Project approach

The project will involve the following tasks:

1. Compile source data—existing PNG, timber harvest, roads, natural disturbances, etc.
2. Develop and provide forecasts of baseline industrial and natural development.
3. Analyze forecasts and summarize habitat components relevant to boreal caribou.

Project deliverables

The following project deliverables will be provided.

1. Maps and data for industrial and natural disturbance scenarios.
