

SCEK Project Profile

Project Name:	Review of North East Crown Conservation Land Designations
Project Number:	CC-2015-02
Proponent:	Ducks Unlimited Canada (DUC)
SCEK Funding Envelope:	Collaboration and Communication
Timeframe:	February 2, 2015 to February 28, 2016

Project objectives

Review all Crown conservation lands in the North East BC and make recommendations on updating current conservation land designations.

Project description

This project will aim to address knowledge gaps and the volume of referrals to agencies holding Crown conservation land tenures and stream line the authorization process for the OGC, Front Counter BC and the Ecosystems section of the BC Ministry of Forest, Lands, and Natural Resource Operations (FLNRO).

Year 1 of a 2 year project will review all non-administered conservation land act files with a purpose code of Environment Conservation and Recreation, administered through the Fort St. John office of FLNRO to determine:

1. Original values and management intent for the designated area;
2. Original interest holder;
3. Appropriate current interest holder (point of contact for referrals);
4. Current values and management options, and;
5. Recommendations for administrative actions (cancellation, retention, changes of sub-purpose, transfer of interest holder, establishment of wildlife management areas, etc.).

Project deliverables

The deliverables from this project include the following:

1. Assessment Report—on the inventory of Crown conservation land designations (parcels) for removal and those parcels to keep.
2. Status Report—summarizing activities for year 1 and plans for year 2.
