

SCEK Project Profile

Project Name:	Digitize Historical Wildlife Distribution Maps
Project Number:	BCIP-2013-04
Proponents:	CloverPoint Ltd. HR GISolutions Inc.
SCEK Funding Envelope:	Boreal Caribou
Timeframe:	March 1, 2013 to November 1, 2013

Project objectives

The following services will be provided:

- Digitize historical wildlife distribution maps into a digital platform for use by the Research and Effectiveness Monitoring Board (REMB); and
- Document methods used to produce the historical wildlife distribution maps.

Project description and approach

This project will involve the following:

- Digitize one map and obtain sign-off from the REMB. The sign-off will confirm the format is consistent with the BC government standards and the requirements of the REMB;
- Complete digitization of remaining maps and obtain sign-off from the REMB; and
- Draft the report documenting how the historical wildlife distribution maps were produced.

Project deliverables

The deliverables from this project include the following:

- Geodatabase containing polygons and attributes from 28 maps; and
- 28 Georeferenced and catalogued digital species distribution maps.
- A report documenting the methods used to produce the historical wildlife distribution maps.
